

My husband and I contacted Michael Pomarico in October 2001 to inquire about building our "dream center hall colonial." We found out about Michael Pomarico by his wonderful reputation in the county. We signed the contracts the day we met and our foundation was poured in November 2001. Our home was finished true to Michael Pomarico's word in May 2002 and we moved in. Our home was built with the utmost care and exquisite quality that one would wish for when building their dream home.

Unfortunately right after signing our contract I was diagnosed with breast cancer and had to undergo chemo treatments etc. Michael Pomarico told us that we would not have any worries at all while the house was being built and that he would take care of everything and make it go as smooth as possible and he did.

My most memorable experience other than the beautiful home that he built for us was Michael Pomarico's amazing caring attitude. He would call me while I was undergoing treatment and ask me if I needed anything, even if I needed a container of milk and that he would bring it to me because he knew I was at home ill and my husband was at work and my two small children were in school. This is the type of character in a person along with good workmanship that you want when building a home. We have not had any major problems with our home since the day it was built. If we had any questions when the house was first built Michael would answer any questions we had with no problems whatsoever.

If my husband and I ever decide to build another home in the future we would not hesitate to call on Michael Pomarico again. Thank you Mike Pomarico. Sincerely, Terri Bianco
