

Our home was built in 2004.

Mike was very good to work with; his approachable and easygoing nature put us at ease.

Our home was built very solidly. In fact, Mike used his experience to recommend and build additional supports in our garage, to keep the bonus room more solid...it worked. Now, more than 4 years later, we have very little in the way of "settling" cracks.

He was very honest and forthright. Anytime changes were put in (usually by us), he was straightforward and fair with any alterations to the costs

We've recommended him several times already, and will continue to do so.
